- Short hire periods available
- A cost-effective net packaging solution

# ClippaNet

# ClippaNet

ClippaNet semi-automatic clipping machines are ideal for packing a number of products in net, in either jumble pack or in-line form, using net tubes of 160mm or 115mm diameter. Products suitable for packing with these machines include fresh produce, bulbs, toiletries, cheese, pre-packed meat, soaps, chocolate coins, toys, etc.

These easily transportable machines are suitable for use with extruded net or knitted net and operate on a 220V/1/50Hz electrical power supply. They are available with a dispenser for feeding pre-printed wineglass labels (as shown) or without a dispenser if labels are not required. Subject to the type of infeed available, packing rates up to 25-30 packs per minute are achievable.
